

COVID-19

If you have had COVID-19

Some of your symptoms can last for weeks and months. This is called long COVID.

We can help, if you have:

Trouble thinking, remembering or concentrating

Loss of taste or smell

Fast or irregular heartbeat

Weakness and fatigue all the time

Shortness of breath or a cough that won't go away

Stress, anxiety or depression

Trouble walking or moving

Been unable to go back to work

Joint or muscle pain

Problems swallowing
